Quick Facts about West Virginia Coal Mining Industry and Power Plants/Energy Production:

* West Virginia ranked fourth among the states in total energy production in 2013, producing 4.6% of the nation's total.

* In 2014, West Virginia was the largest coal producer east of the Mississippi River and the second largest in the nation after Wyoming; the state accounted for 11% of the U.S. total coal production that year.

* In 2014, almost half (50 million short tons) of the coal that was mined in West Virginia was shipped to other states, and almost one-third (34 million short tons) was exported to foreign countries.

* Coal-fired electric power plants accounted for 94% of West Virginia's net electricity generation in 2015, natural gas contributed 1.8%, and renewable energy resources—primarily hydroelectric power and wind energy—contributed 3.7%.

* In 2015, West Virginia was the eighth-largest natural gas-producing state in the nation, with more than 1.3 trillion cubic feet of natural gas production.

The West Virginia Mesothelioma Victims Center wants to emphasize their unsurpassed free services are available statewide to a diagnosed victim in any community in the Mountain State including Wheeling, Morgantown, Martinsburg, Charleston, Huntington, and Fairmont.

The West Virginia Mesothelioma Victims Center is also incredibly focused on making certain a diagnosed victim in the Mountain State has the best treatment options. Two of the better options for diagnosed victims in West Virginia include the Mary Babb Randolph Cancer Center in Morgantown, or the University of Pittsburgh's Cancer Institute:

* The Mary Babb Randolph Cancer Center Morgantown, West Virginia
