

# Universal Rental Enterprise Management Software Now Offers New Integrated Dispatch Board Module

*Universal Accounting Software, Inc. has announced the release of new Dispatch Board module to handle delivery dispatch and scheduling.*

EDGEWATER, NJ, USA, March 6, 2017

/EINPresswire.com/ -- Universal Accounting Software, Inc. is proud to announce the release of its new Dispatch Board module. The new module ties seamlessly to Universal's operation modules including Universal Rental Control, allowing rental companies to easily schedule deliveries via their own fleet of delivery vehicles. Presented in a graphical calendar style, the Dispatch Board shows available trucks by type, date and time, and makes the rental, sales or service process complete from start to finish. The new module allows Universal users to manage their fleet and drivers for efficient and timely deliveries. Real-time data flows to the Dispatch Board from entry of rental contracts, sales orders, and work orders. Dispatchers know which trucks are available or already scheduled, and simple drag-and-drop functionality facilitates routing and scheduling adjustments. The UAS Development team reached out to numerous UAS clients throughout the design process to ensure that the Dispatch Board would add true value to their software product and provide a real-world solution for them. "UAS has 27 years of experience serving the rental industry", states Arleen Coletti, Vice President of Sales for UAS. "I am always excited to see how our product continues evolving to meet the growing needs of our current and future clients. The Dispatch Board is

Universal Rental Enterprise Management Software

“

The Dispatch Board is the perfect addition to the Universal Rental Enterprise Management product, making it the most complete yet affordable rental solution on the market.”
