Automated Truck Loading System market is accounted for \$1.52 billion in 2015 and is expected to reach \$2.88 billion by 2022 growing at a CAGR of 9.5%

PUNE, INDIA, March 6, 2017 /EINPresswire.com/ -- [Global Automated Truck Loading System Industry](#)

Global Automated Truck Loading System market is accounted for \$1.52 billion in 2015 and is expected to reach \$2.88 billion by 2022 growing at a CAGR of 9.5%. There is growing adoption of ATLS systems in various industries as these automation systems helps in significantly reducing the turnaround times, and increase the safety in the work environment since most of the truck loading and unloading takes place in manufacturing/warehouse environments which comprise racking systems, retrieval systems, forklifts, dispensers, and weighing systems among others. However, high manufacturing costs is limiting the market growth. Sawtooth dock segment is anticipated to register highest CAGR during the forecast period. The favourable growth is attributed to its adoption in loading and unloading systems. Europe accounted for the largest share in the market owing to the presence of automotive and large process industries in this region.
