

Hydrogels, Nanocin Technology and Novel Injectable Formulation discussed at Controlled Release Delivery 2017

SMI's Controlled Release Delivery conference will return to London for the 14th year on the 3rd & 4th of April 2017

LONDON, SELECT STATE/PROVINCE, UNITED KINGDOM, March 6, 2017 /EINPresswire.com/ -- [The 14th annual conference](#) will gather drug development experts and formulation specialists to explore the latest innovations made within the industry. Topics which will be discussed include: lipid suspension, novel injectable formulations, controlled erosion, parenteral and oral controlled release strategies, parenteral delivery, nanocin technology, nanomedicine and so much more.

Hydrogels and nanocin technology will be hot topics discussed throughout the [two day program](#).

Patrick Garidel, Associate Director of Protein Science from Boehringer Ingelheim will provide a presentation on day two of the conference on 'Hydrogel formulations for biologics' where he will discuss and provide case studies on:

“

Hydrogels and nanocin technology will be hot topics discussed throughout the two day program.”

SMi Group

- Rational for sustained release formulations for biologics
- Influence of gel network properties on release kinetics
- Impact of molecular format on release kinetics
- Drug-delivery system compatibility

Liam Good, Director of Tecrea Ltd will present on day one on 'Delivery and release of small molecules and biologics using nanocin technology'. Liam will provide an overview of nanocin technology, discuss the mechanisms of nanocin-mediated

cell entry and release as well as provide examples of small molecule and biologics delivery and collaborative projects.

Joining Boehringer Ingelheim and Tecrea Ltd include Janssen, GSK, Novartis Institutes for BioMedical Research, Evonik Nutrition and Care, Nanomerics, Ascendia Pharmaceuticals, Nanomerics, InnoCore Pharmaceuticals, NEUWAY Pharma and many more...
