

Why is Good Network Documentation So Hard to Find?

Network documentation is crucial to efficiency and IT cost reduction, but for many organizations, it's been cost-prohibitive...until now.

GAITHERSBURG, MD, UNITED STATES OF AMERICA, March 7, 2017 /EINPresswire.com/ -- Sticky notes on servers. Relying on one guy who remembers everything (but is about to retire). A general attitude of denial that network documentation is important. Even worse? A staggering 1 in 3 servers is drawing power but not performing any function. If network documentation matters (and it does), why is it so hard for organizations to adopt?

One word: cost. Until now, network documentation has meant investing in an on-premises, expensive solution or using a far-from-ideal series of hacks that end up causing more problems than they solve.

The cloud (software-as-a-service solutions) has been making big waves this year for its entry into the enterprise-grade software market. Now, enterprise grade solutions are harnessing the power of the cloud to enter the B2C market with the ability to offer versions of their solutions at affordable price points. netTerrain Cloud, [from Graphical Networks](#), is an enterprise-grade network documentation solution that just hit the Cloud.

Although a handful of other cloud platforms that can be used for documenting exist, netTerrain Cloud is unique. It's a pared-down version of a true enterprise-grade network documentation solution: netTerrain. Built by pros with decades of experience working with networks and network documentation, netTerrain is currently employed by leading companies and government organizations throughout the world.

Now, netTerrain Cloud will make network documentation easy for organizations of all sizes and across all budgets. With monthly plans starting at just \$95 a month, netTerrain Cloud is a true network documentation that is accessible for everyone. Currently in its beta-testing phase, free trials are being offered without the requirement for a credit card. Interested users [can sign up at netTerrain.com](#).
