

# DevOps Agile Skills Association – DASA DevOps Practitioner Goes Live Today

*DASA Announces the release of the DevOps Practitioner Qualification - Empowering DevOps Practitioners to Master the Skills for High-Performance DevOps Teams*

WILMINGTON, DELAWARE,  
DELAWARE, UNITED STATES, March 9,

2017 /EINPresswire.com/ -- Today traditional enterprises are on a transformation journey, recognizing that IT is the strategic differentiator for success. They are implementing automation and continuous improvement programs and simplifying their operating models. Those professionals who are working day in day out to achieve this transformation should be equipped with the relevant skills required to be successful. They need to be the craftsmen, masters of their trade - DASA refers to these professionals as DevOps Practitioners.

The [DASA DevOps Practitioner Qualification](#) is for those who want to demonstrate they have what it takes to lead, who have the courage to act, who improve themselves every day and work in concert with their team members. The Practitioner builds on the Fundamentals qualification which provides the core vocabulary and understanding of DevOps principles. With this core set of knowledge in hand, the DevOps Practitioner certification allows professionals to demonstrate their skills.

The Practitioner syllabus requires DASA Courseware Partners to offer training programs that include practical examples and exercises, and interactive group discussions, to understand how to apply the necessary skills to practice DevOps. "We are extremely excited to announce the market release of DASA's DevOps Practitioner qualification to our worldwide community of members who are leading Training, Consulting, Software and Corporate members." says, Deborah Burton, Managing Director, DASA.

## [About DASA](#)

[DevOps Agile Skills Association](#) (DASA) provides an open, global community for DevOps and Agile skills development. It is organized as a community-driven platform open to participating member organizations to help define role-based competencies and learning curricula.

To realize its broader purpose, DASA aims to:

- \_ Generate interest in and awareness of the need for skills development
- \_ Define a relevant and vendor-neutral DevOps qualifications program for professionals
- \_ Promote an open source DevOps, Agile Competence Model
- \_ Ensure a baseline quality for training programs delivered to the market
- \_ Map members' training program content against the role-based competencies baseline
