

AI Enabled Customer Relationship Management and IoT Enabled Enterprise Resource Planning Market Forecast 2022

OrbisResearch.com has published new research report on "AI Enabled (CRM) and IoT Enabled(ERP) Market Outlook and Forecasts 2017-2022" to its database.

DALLAS, TEXAS, U.S.A., March 10, 2017

/EINPresswire.com/ -- There are two powerful technologies transforming internal enterprise processes as well as external customer-facing business processes. These technologies are Internet of Things (IoT) enabled Enterprise Resource Planning (ERP) and Artificial Intelligence (AI) enabled Chatbots respectively. IoT software and systems are transforming ERP solutions through significantly enhanced abilities to connect people, processes, data, and things in one repository. Chatbots represent an advanced technology for automated Customer Relationship Management (CRM) solutions.
