

# Using Intelligent PDUs is released in Geist white paper

*Powering the Cloud: Using Intelligent PDUs to Prevent the Storms of Downtime*

LINCOLN, NEBRASKA, UNITED STATES, March 15, 2017

/EINPresswire.com/ -- Geist, a leader in data center solutions, is uncovering the foundation of better power management in a new white paper, [Powering the Cloud: Using Intelligent PDUs to Prevent the Storms of Downtime](#).

With power-related downtime causing so much damage across organizations, Geist strives to relate the importance of meticulous power management. Geist Upgradeable adapts to your business well into the future; with remote power monitoring, data center managers can receive notifications of current threshold breach, preventing unnecessary downtime. The release of this white paper may help answer PDU questions at hand.

###

About Geist

Geist designs and manufactures intelligent hardware and software for the four cornerstones of data center management: Power. Cool. Monitor. DCIM. Independently, each Geist product line offers industry-leading capabilities and technology. Together, these products combine to create a comprehensive system for maintaining a secure and efficient data center. With a host of scalable systems for single cabinets, entire enterprises and everything in between, each customer benefits from data center infrastructure management (DCIM) solutions custom-fit for their specific needs. Founded in 1948 and headquartered in Lincoln, Nebraska with offices in Asia Pacific and Europe, Geist offers truly global solutions that revolve around customer requirements.
