## Market Research Analysis

Among all applications, construction segment is expected to grow rapidly owing to the high growth in the construction industry. High growth of the construction industry is generating huge demand for backhoe loaders. In addition, flexibility of backhoe loaders for performing various tasks has led to the demand of backhoe loaders. The rapid increase in road construction activities and in the number of power projects in developing countries such as India, have also

fueled the growth of Global Backhoe Loader Market.

Asia-Pacific is the largest and fastest growing market for the backhoe loaders. China and India are the biggest markets in the region due to the recent technological developments, and increase in the number of power projects, construction of dams and canals resulting in the significant growth of the construction industry. In North America and Europe the growth of the backhoe loader market can be attributed to the significant infrastructural development in the region.
