

Deneb Releases Enhanced Construction Accounting Software Dashboards

Managers now have access to key business metrics presented in colorful, graphic forms with drill-down capabilities.

FOUNTAIN HILLS, AZ, USA, March 21, 2017 /EINPresswire.com/ -- Deneb software announces the release of its newly designed dashboard, giving managers key business metrics presented as colorful column charts, pie charts, and bar charts, with drill-down capabilities that show the detail behind the graphics. The dashboard displays AP and AR aging, current bank balances, year-to-date sales, job cash flow, current backlog, and more. All graphs are real-time, based on data as current as the last posting. The screen displays up-to-the-minute results each time the data is refreshed. The eDeneb dashboard is an integral part of the eDeneb system, with no use of third-party required.

eDeneb is the latest offering of Deneb Construction Accounting and Estimating software, available in the cloud or installed on the user's local server. eDeneb encompasses an integrated suite of accounting applications, including Accounts Payable, Accounts Receivable, Payroll, and General Ledger, as well as modules for Job Cost, Estimating, Equipment Control, Inventory Control, Purchase Orders, Work Orders and AIA billings. The Mobile System module is a field gateway to numerous functions for use on a mobile device such as a tablet, PC, or other device. Work orders, purchase orders, and remote timecard input are some of the mobile functions available.

Deneb software has been serving the special needs of contractors for over 30 years. eDeneb retains all of the functionality offered by the company's earlier products, and at the same time delivers expanded capabilities available only with 21st century technology.

For more information, call Deneb @ 800-952-7888 or visit www.denebsoftware.com.
