

Restenosis Therapeutic and Drug Pipeline Review H1

Global Restenosis Drugs and Companies Pipeline Review H1 2017

PUNE, INDIA, March 22, 2017
/EINPresswire.com/ --

[Restenosis](#) - Pipeline Review, H1 2017

Summary

Restenosis is re-narrowing of a blood vessel which leads to restricted blood flow. Symptoms include shortness of breath, difficulty walking and chest pain. Risk factors include increasing age, gender, family history or race and diabetes. Treatment includes surgery and thrombolytic therapy.

Report Highlights

Pharmaceutical and Healthcare latest pipeline guide Restenosis – Pipeline Review, H1 2017, provides comprehensive information on the therapeutics under development for Restenosis (Cardiovascular), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research and development history and latest news and press releases.

The Restenosis (Cardiovascular) pipeline guide also reviews of key players involved in therapeutic development for Restenosis and features dormant and discontinued projects. The guide covers therapeutics under Development by Companies /Universities /Institutes, the molecules developed by Companies in Phase II, Preclinical and Discovery stages are 1, 3 and 1 respectively. Similarly, the Universities portfolio in Preclinical stages comprises 3 molecules, respectively.

Restenosis (Cardiovascular) pipeline guide helps in identifying and tracking emerging players in

the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Scope

- The pipeline guide provides a snapshot of the global therapeutic landscape of Restenosis (Cardiovascular).
- The pipeline guide reviews pipeline therapeutics for Restenosis (Cardiovascular) by companies and universities/research institutes based on information derived from company and industry-specific sources.
- The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.
- The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.
- The pipeline guide reviews key companies involved in Restenosis (Cardiovascular) therapeutics and enlists all their major and minor projects.
- The pipeline guide evaluates Restenosis (Cardiovascular) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.
- The pipeline guide encapsulates all the dormant and discontinued pipeline projects.
- The pipeline guide reviews latest news related to pipeline therapeutics for Restenosis (Cardiovascular)

Reasons to buy

- Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.
- Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.
- Find and recognize significant and varied types of therapeutics under development for Restenosis (Cardiovascular).
- Classify potential new clients or partners in the target demographic.
- Develop tactical initiatives by understanding the focus areas of leading companies.
- Plan mergers and acquisitions meritoriously by identifying key players and it's most promising pipeline therapeutics.
- Formulate corrective measures for pipeline projects by understanding Restenosis (Cardiovascular) pipeline depth and focus of Indication therapeutics.
- Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope.
- Adjust the therapeutic portfolio by recognizing discontinued projects and understand from the know-how what drove them from pipeline.
