

# Delaware Integrative Medicine now providing STEM Cell Treatments

*Dr. Henry Childers, owner of Delaware Integrative Medicine, announced the addition of autologous STEM cell treatments to his practice located in Georgetown, DE.*

GEORGETOWN, DELAWARE, USA, March 22, 2017 /EINPresswire.com/ -- Many recent studies

As use of this technique expands we expect Dr. Childers to be on the forefront of these treatments constantly improving the outcomes.”

*Bruce Bertman*

have shown significant benefit by harvesting a patient’s Mesenchymal [Stem](#) Cells (MSCs) and utilizing them to address a number of issues related to muscular skeletal pain. Dr. Childers is very focused in addressing pain management. He believes that more patients will choose this therapy for chronic pain as awareness of the procedure and its numerous benefits increase.

Dr. Henry Childers stated, "We want people to enjoy life and not have pain stop them from enjoying every minute they can." Utilizing a patient’s own ADSCs (Adipose Derived STEM Cells), provides a natural and convenient alternative for soft

tissue repair than costly and more invasive surgical procedures. This type of treatment option has become increasingly popular particularly with professional athletes who turn to the procedure for sports injuries.

Dr. Childers continued, “countless studies have shown remarkable results when doing an in office liposuction of a patient and segmenting the inherent Mesenchymal STEM cells for direct injection into damaged joints. The treatment is simple effective and can be done in under 2 hours in our office. The results we are seeing are more than encouraging. Patients are stopping the use of pain killers and actually healing the damage, not masking it.”

Bruce Bertman CEO of Zizion Group who supplied the equipment to Delaware Integrative Medicine stated, “Dr. Childers is extremely knowledgeable in this area and sees incredible opportunity to treat patients with an autologous solution that genuinely can resolve their issue.” Bertman continued, “As use of this technique expands we expect Dr. Childers to be on the forefront of these treatments constantly improving the outcomes.”

About Dr. Childers and Delaware Regenerative Medicine
