

Hybrid Operating Room Industry and Worldwide 2027 Foresight Report

Global Hybrid Operating Room market Research Report by application By Devices (operating tables, room lights, surgical booms, others) - Forecast to 2027

PUNE, MAHARASHTRA, INDIA, April 6, 2017 /EINPresswire.com/ -- A [hybrid operating room](#) is a surgical theatre that is equipped with cutting edge medical imaging devices for example fixed C-Arms, CT scanners or MRI scanners. As its main principal a hybrid operating room combines developed imaging capability with a full functioning operating room. Though many hybrid processes can be performed in a traditional operating room with a portable e-arm or in a catheterization room, optimal imaging and technical functionality can be operated in a dedicated hybrid operating room. [Global hybrid operating room](#) has been segmented on the basis of application Hospitals, Clinics, Medical Research firms and others. On the basis of devices operating tables, room lights, surgical booms and others
