

Idaho Mesothelioma Victims Center Now Urges a Diagnosed Power or Energy Worker in Idaho To Focus on The Best Compensation and To Call Them About the Nation's Top Lawyers for Results

NEW YORK, NEW YORK, USA, April 21, 2017 /EINPresswire.com/ -- The Idaho Mesothelioma Victims Center says, "We are urging a power or energy worker in Idaho who has just been diagnosed with mesothelioma to call us anytime at 800-714-0303 to ensure they really are talking to the nation's most capable and skilled mesothelioma attorneys. A power or energy worker frequently can receive the top mesothelioma compensation awards. In many instances people like this were not just exposed to asbestos in Idaho-in all likelihood they were also exposed to asbestos in other states.

"As an example of multi state exposure to asbestos-frequently power companies have agreements where if one state is hit hard by a storm-electrical crews from throughout the region respond. We are certain energy workers will verify in these instances it was more important to restore power than to avoid asbestos or other dangerous materials. Additionally, many power or energy workers learned their trade while serving in the US Navy. A Navy Veteran/power-energy mesothelioma compensation claim for a person in Idaho could easily exceed a million dollars as we would like to discuss anytime at 800-714-0303."

QUICK ENERGY FACTS-IDAHO

§ Idaho is rich in renewable energy resources; the state's volcanic formations provide substantial geothermal energy potential.

§ In 2015, 75% of Idaho's utility-scale net electricity generation came from renewable energy

resources, and Idaho was tied with West Virginia for the sixth lowest average electricity prices in the United States.

§ In 2015, Idaho's in-state net electricity generation equaled 66% of the state's total electric industry retail sales. The remainder came from other states and international imports.

§ Hydroelectric power supplied 54% of net electricity generation in Idaho in 2015, the fourth largest share in the nation. Drought reduced hydropower's share from the average 74% of the previous 10 years.

§ Idaho's wind generation provided 16% of utility-scale net electricity generation in 2015
