

SURELINE SYSTEMS AND ONIX INK STRATEGIC PARTNERSHIP AGREEMENT

Onix to Leverage SUREedge Migrator to Deliver Market's Fastest Agentless Migration Solution

SAN JOSE, CALIFORNIA, US, April 10, 2017 /EINPresswire.com/ -- San Jose, Calif. – April 10, 2017, Sureline Systems, a leader in enterprise-class physical and virtual server, cloud, and container migration and disaster recovery software solutions today formally announced a strategic technology partnership agreement with Onix, a top Google Cloud Premier Partner that resells the entire Google Cloud portfolio. Under the terms of the partnership, Onix can now include the Sureline SUREedge® Migrator software license as a key component of

its migration services offerings. Additionally, the Onix team can deliver the SUREedge Disaster Recovery software component with its industry-leading Google Cloud solutions.

“

As cloud consultants, Onix provides customers direction on how to best move to the cloud. The Sureline products help us ensure customers get a fast and reliable migration.”

John Lawler, Director of Onix's Cloud Professional Services

John Lawler, Director of Onix's Cloud Professional Services team commented, “We are pleased to add Sureline Systems as one of our strategic partners. As cloud consultants, Onix provides customers direction on how to best move to the cloud. The Sureline products help us ensure customers get a fast and reliable migration.”

“We are very excited to enter into this partnership with such an outstanding industry leader,” said George Symons, COO, Sureline Systems, Inc. “We believe that including our SUREedge solutions as part of Onix's Google Cloud initiatives will expand their migration offerings and provide an outstanding experience for their customers.”

About SUREedge Migrator

SUREedge Migrator captures application consistent images from any physical or virtual server. These point-in-time images are then replicated using efficient deduplication, compression and encryption, to a local or remote site or Cloud. SUREedge Migrator includes a migration planner to develop an end-to-end plan to automate the overall migration process. The plan identifies which machines are to be migrated and when, and defines any interrelationships between servers that create complex

applications. SUREedge leverages its automated transformation functionality to migrate from any source to any target, local or remote site or Cloud, where dissimilar hardware or operating environments can be used at the source and target.

About SUREedge Disaster Recovery

SUREedge Disaster Recovery (DR) delivers enterprise-class DR with WAN-optimized active-active replication, global deduplications, compression, and encryption. With SUREedge DR, IT managers can securely and quickly protect all applications, operating systems, data, etc., replicating from any physical or virtual server to any target, Cloud or remote site. A central management console and agentless architecture lower operational expenditures (OpEx) for an efficient and cost-effective solution. SUREedge uses a snapshot when capturing a recovery point to ensure that when a failover occurs, a full consistent image is recovered. DR plans can be tested with no impact on the production environment to ensure confidence and speed of execution if a disaster should occur.

About Onix

Onix (Onix Networking Corp.) is a leading developer and provider of technology solutions and consulting services to a broad range of corporate and government customers. Onix partners with technology industry leaders and offers extensive expertise in the design and implementation of end-to-end comprehensive solutions. Onix has been a Google partner since 2001 and has been recognized by Google as well as customers with numerous awards for work done in North America and globally. Most recently, Onix received the Google Cloud 2016 North American Partner Award for G Suite Customer Success. For more information, visit www.onixnet.com.

About Sureline Systems

Sureline's patented, award winning SUREedge® is a proven enterprise-class software solution for Cloud Migration, Cloud Disaster Recovery, Datacenter Consolidation and Application Mobility. SUREedge reduces risk through encrypted and efficient data transmission, and reliable transformation of the entire application, its data and interdependencies from source server to the target server virtualization or Cloud. It is easy-to-deploy and manage through a single UI, with automated discovery, no agents to install, and is completely non-disruptive. SUREedge is source and destination agnostic working to/from any physical server, any hypervisor (including hyperconverged infrastructures), any cloud, and any storage. Customers worldwide trust SUREedge to meet their workload migration, disaster recovery and application mobility objectives. Sureline is headquartered in San Jose, CA., and its products and services are available through a global network of VARs and technology service providers.
