Key points to buy

- What was the size of the global waste management market by value in 2016?
- What will be the size of the global waste management market in 2021?
- What factors are affecting the strength of competition in the global waste management market?
- How has the market performed over the last five years?
- How large is the global waste management market in relation to its regional counterparts?

Key Highlights

The waste management industry consists of all municipal solid waste (MSW) - including non-hazardous waste generated in households, commercial establishments and institutions, and non-hazardous industrial process wastes, agricultural wastes and sewage sludge. The industry's value represents the amount of total typical charge per tonne for landfill multiplied by the volume of MSW generated. The industry's volume represents the total MSW generation. All currency conversions used in the creation of this report have been calculated using constant 2015 annual average exchange rates

The global Waste Management industry is expected to generate total revenues of \$76,277.7m in 2016, representing a compound annual growth rate (CAGR) of 0.9% between 2012 and 2016. Industry consumption volume is forecast to increase with a CAGR of 1.3% between 2012-2016, to reach a total of 1,282.2 million tons in 2016.

The performance of the industry is forecast to decelerate, with an anticipated CAGR of 0.7% for the five-year period 2016 – 2021.
