report provides major statistics on the state of the industry and valuable source of guidance & direction for companies and individuals interested in the market

PUNE, INDIA, April 11, 2017 /EINPresswire.com/ -- The global market for [smart wearables](#) is projected to cross US\$ 30 Billion by 2020. Initially, the adoption of these devices was confined to developed countries because of the high cost. However, with the decline in cost, vendors have shifted their focus to developing countries to increase their revenue and market base. The factors like growing IT spending, rising health concerns, growing popularity of smart wearables among consumers, an expanding smartphone user base globally, coupled with continuously declining prices of smart wearables are anticipated to propel demand for different types of smart wearables during the over the next six years.
