Description

Wiseguyreports.Com Adds "Contact Lenses -Market Demand, Growth, Opportunities and Analysis of Top Key Player Forecast To 2022" To Its Research Database

According to Statistics MRC, the Global Contact Lenses Market is expected to grow at a CAGR of 3.67 % during the forecast period. Growing incidence of ophthalmic disorders and rising geriatric population are the key factors driving the market growth. Furthermore, online retailing and escalating trend of contact lenses being seen as a fashion quotient by the youth is expected to fuel the market. However, increasing acceptance of laser eye surgeries globally may hamper the market during the forecast period.

Accounting for more than 80% of the global demand in 2015, Soft contact lenses commanded the largest market. Demand for daily disposable contact lenses is anticipated to grow strong during the study period, owing to benefits such as high level of cleanliness and reduced risk of infections. With more than 45% of the overall shipments in 2015, spherical lenses are estimated to lead the global market. On the other hand, fueled by demand in treating presbyopia and other age-related ophthalmic ailments multifocal contact lenses are projected to grow rapidly than the worldwide average. North America accounted for more than 30% of the global demand in 2015, and is estimated to remain the largest market during the forecast period. However, Asia Pacific is anticipated to grow at the highest CAGR during the study period.
