Clear Sky Software Releases New Inventory Systems

Besides the company's proven Food and Beverage inventory software, new applications are available to control Housekeeping, Retail and Tableware inventories.

CHARLOTTE, NORTH CAROLINA, UNITED STATES, April 11, 2017 /EINPresswire.com/ -- Clear Sky Software, Inc. ® announced today the release of Clear Sky Inventory Version 3.0 that includes new inventory systems for the hospitality industry. In addition to the company's proven Food and Beverage inventory software, three new applications are available for controlling Housekeeping, Retail and Tableware inventories. These new inventory systems are available immediately for hotels, clubs, restaurants or any hospitality organization that desires better inventory control in these departments.

> "For the hospitality industry, this establishes a single solution for controlling BEVERAGE, FOOD, HOUSKEEPING, RETAIL and TABLEWARE inventories."
>
> *Jay Williams, Director of Marketing & Sales*

Clear Sky HOUSEKEEPING allows companies to track linens, supplies, and in-room amenities. Clear Sky RETAIL provides better control over all gift shop items while Clear Sky TABLEWARE helps users track china, glassware and flatware.

All of these new applications support more efficient ordering, easier transfer of inventory to outlets and the ability to count items by existing or system-generated bar codes. Reports are available by date, location, vendor, item, invoice and can be exported to multiple file types. The bottom line for users, this new software eliminates tedious, time-consuming paperwork, manual data entry, and repetitive steps often required to control inventory.

"For the hospitality industry, this establishes a single solution for controlling BEVERAGE, FOOD, HOUSEKEEPING, RETAIL and TABLEWARE inventories. All of these systems can be bundled together in any combination and implemented as an on-premise or hosted solution. A bonus for our existing and new clients – all five inventory applications use the same user interface which supports faster ramp-up times and easier cross-training."
Jay Williams, Director of Marketing & Sales

All Clear Sky Software inventory systems represent a turn-key solution to include inventory software, mobile and fixed bar code scanning equipment, and touchscreen kiosk workstations. Services include installation and data set-up assistance and a choice of on-site or web-based training. Support includes software maintenance programs, equipment repair programs with loaner equipment, software upgrades and enhancements.

About Clear Sky Software
