Freightgate Awarded 2017 Top Logistics Technology Provider By Inbound Logistics Magazine

Freightgate was awarded for their knowledge, experience and technology that optimizes logistics, provides supply chain excellence and transforms organizations.

FOUNTAIN VALLEY, CALIFORNIA, US, April 11, 2017 /EINPresswire.com/ -- Freightgate, the Premier Innovation Leader in cloud computing and mobile applications for logistics and global supply chain management, was awarded by Inbound Logistics Magazine as a 2017 Top 100 Logistics Technology Provider. Freightgate has won this prestigious award since the award's inception in 2002. Freightgate was chosen based on their knowledge, experience and technology that optimizes logistics, provides supply chain excellence and transforms organizations.

Freightgate - Top Logistics Technology Provider

For over 15 years Inbound Logistics Magazine has recognized Freightgate as a Top Logistics Technology Provider. Freightage's Logistics Cloud solutions help global companies to maximize end-to-end supply chain visibility and streamline processes to manage freight contracts, procurement, pricing, quotations, routing, tracking, and scheduling of transportation. These top-ranked solutions enable the analysis and execution necessary to improve profitability and customer service levels while mitigating risks.

> "
>
> I would like to challenge anyone to share with us their toughest Logistics problem and allow us to come up with a creative, maybe awe-inspiring, potentially out of the box solution."
>
> *Martin Hubert, President of Freightgate*

Freightgate's Logistics Solutions reflects Inbound Logistics readers' diverse technology needs for: simplicity, fast ROI, customized implementation, and emphasis on end-to-end collaboration software solutions. "Today's business leaders are struggling to balance the need for advanced planning against the demands for supply chain agility, reducing inventory touches, and wrangling the complexity of omni-channel distribution regimes," said Felecia Stratton, editor, Inbound Logistics. "Freightgate continues to provide solutions to help meet those challenges, and that's why Inbound

Logistics editors have recognized Freightgate as one of 2017's Top 100 Logistics IT Providers."

"We are proud that our efforts are recognized by thought leaders, independent third parties and our customers alike. As the Inbound Logistics (IL) team sees many different solutions come and go, having been part of the IL Top 100 for so many years is an honor I gladly share with the entire Freightgate team" says Martin Hubert, President and CEO of Freightgate – "I would like to challenge anyone to share with us their toughest Logistics problem and allow us to come up with a creative, maybe awe-inspiring, potentially out of the box solution."

Since the early 1990's, Freightgate has been a leader in cloud computing and mobile applications for logistics and global supply chain management. Freightgate's cutting-edge Logistics Cloud technology unlocks a new age of competitiveness giving every business equal opportunity to participate in global markets with smart logistics tools and greater agility.

Freightgate's Logistics Cloud Suite, known as the Freightgate Universe, enables solutions empowering professionals on all levels to collaborate with global vendors and logistics providers seamlessly on a single common transportation sourcing platform for informed decision-making across the entire network. It encompasses ISO9001:2008-certified end-to-end transportation management processes from procurement, rate management, optimization, execution and visibility, carbon footprint, through invoice audit & pay. The Freightgate Universe is comprised of adaptive easy-to-deploy modules to help companies leapfrog into the 21st century with minimal start-up cost. Freightgate is the only commercial EFM compliant platform enabling standardized web-services as promoted by the US-DOT and Transport-Canada.
