North America Automatic Fare Collection (AFC) Systems Market

Description

AFC machine is the equipment used in the automatic fare collection system. The elements of AFC system are:

Ticket vending machines (TVMs), where passengers can buy a ticket for their journey Ticket office machines (TOMs), used by railway staff to issue tickets at stations

Add value machines (AVMs), where passengers having a stored value ticket can increase the residual value.

Fare gates, which form a barrier between the

""unpaid"" area of the station and the ""paid"" area where passengers must possess a valid ticket. The faregate will read and release the gate when a valid ticket is presented. Tickets, which come in a number of varieties (according to the system in use) but which all have an electronically encoded data content indicating the validity and/or use of the ticket. A computerised accounting and management system, which consists of a station computer for each station and a central computer linked to all the stations."
