PUNE, INDIA, April 17, 2017 /EINPresswire.com/ -- Summary

According to Statistics MRC, the Global [Enterprise Synthetic Application Monitoring](#) market is accounted for \$802.13 million in 2015 and is expected to reach \$2,746.37 million by 2022 growing at a CAGR of 19.2%. In the present era of software's and applications, which are driving the economy across globe, the testing procedure or to monitor these technologies is must to ensure its full capability. Increasing management of critical applications and growing importance of SaaS (Software as a Service) application are some of the factors proliferating market growth. However, lack of awareness and rooted traditional methods are inhibiting the growth.

SaaS (Software as a Service) application segment is expected to dominate the market growing with highest CAGR, the reason behind is its actively monitoring and troubleshooting end-user experience. Large enterprise segment is expected to dominate the market owing to its maximum use in professional software's and legitimate applications. North American market has humongous share in market as compared to other regions on account of demand for active monitoring techniques for complex applications.
