

# World's 1st Home Use Remote Control Lumbar/Cervical Traction Bed with Smart Features - ALPHA by Lumbar Traction M'sia

*Lumbar Traction Malaysia PLT introduces its latest model named, ALPHA. A device that can help heal/ relieve back & neck pain very effectively.*

JOHOR BAHRU, JOHOR, MALAYSIA, April 18, 2017 /EINPresswire.com/ -- JOHOR BAHRU, MALAYSIA - 1/05/2017 - [Lumbar Traction Malaysia PLT](#)

introduces its first flagship model named, the [ALPHA](#). Traction therapy has been practiced for a thousand years and has worked wonders for many suffering from back/ neck pain. The ALPHA offers sufferers of back/ neck pain a device that can help heal/ relieve their pain very effectively. There are no need for medicines, doctor appointments, surgery, exercises and you don't even need to leave your home!

The ALPHA creates a whole new revolution in back/ neck care and pain relief. Until now, back/ neck pain sufferers have to travel to a physical therapist for any traction therapy. Even if they can afford to purchase a hospital version of the traction bed, it cannot be operated alone and would require a trained personnel to operate. It is simply too expensive, complicated and takes up too much space.

“

The user only needs to lie down on the bed for 20-30 minutes a day. Its that simple. Truly the best device available for back/ neck pain”

*Mr. Yap*

Low quality manual traction beds and even portable ones are worse. They are not reliable and does not allow the user to set any settings. They break easily and is extremely difficult to operate. They present many dangers that is simply not worth

the risk. After extensive research, it was found that the market is filled with devices that does not work. This was the initial motivation behind the development of ALPHA.

Mr Yap, the founder of Lumbar Traction Malaysia PLT suffered from back pain at an early age and has tried Western physicians, Chiropractors, Traditional Chinese Medicine (TCM) physicians from both Malaysia and China. He tried everything from oral medication, injections, acupuncture, joint manipulation, physical therapy and exercises. It was until the lower back pain became unbearable and severely affected day to day life that Mr Yap discovered the incredible benefits of Lumbar Traction beds.”The user only needs to lie down on the bed for 20-30 minutes a day. Its that simple. If you add some stretching and strengthening exercises to your routine, you can see amazing results. It is truly

the best device available for back/ neck pain,” said Mr Yap.

Mr Yap, being Malaysian found that traction beds are not available in Malaysia. He felt a responsibility to introduce this amazing device to his countrymen. He vowed to solve the above issues and develop a one man operated, remote controlled with smart display features, safe, comfortable, reliable, accurate and affordable Lumbar & Cervical Traction bed. Most importantly, it must be suitable for home use.

The result was ALPHA, a World No.1 feat jointly created by Users, Manufacturer and Medical Professionals. It is the World’s First English Language Electric Remote Control Lumbar/ Cervical Traction Bed with Smart Features for Home Use!

Amazing features of the ALPHA:

- 1.1st in the World - Remote control with Smart Display features for home use
- 2.Emergency Stop Button
- 3.REAL Force Compensation
- 4.Safety - Traction Bed will work even with sensor wire cut off/ damaged
- 5.Anti Clip Technology
