Market Research Future

In the year 2015, the global market size of Smart Personal Safety and Service Device has been valued at US ~\$20.3 billion which is growing with CAGR of ~8%. Growing demand for big data analytics and market of data interpretation is expected to drive the market to US ~\$36 billion by the end of forecast period. Global Smart Personal Safety and Service Device is growing rapidly and the main factor which is supporting the market is increasing advancement in communication technologies. Growing interest of government, industrial sectors and corporates towards Smart Personal Safety and Service Device is

helping the market to grow.

Increasing security concerns for women and children acts as a major driving factor for this market and the growing inclination of smart wearable devices with advanced features is expected to fuel the growth of the personal safety devices globally. However, high price associated with these devices and lack of awareness across the globe is acting as a barrier for this market during the forecasted period.
