

ACheck21 Announces Open Standard API for ACH and Check Capture

Open Standard API offers easy access to work flow automation for ACH and Check Capture and includes a Mobile SDK for Apple and Android

ST CHARLES, MISSOURI, UNITED STATES, April 24, 2017

/EINPresswire.com/ -- ACheck21® is announcing it's Open Standard [API](#) for both payment and deposit of [ACH](#) and Checks as a single workflow. The service will support iOS, Android and Windows. The API offers the simplest way to move money and includes a flat transaction fee, white label, Identity Verification, Fraud Detection, Same Day Deposits, REST-based API and [Mobile](#) SDK. As with all ACheck21 FinTech CloudSM services, the API will offer unmatched support, automated work flow and documentation all within ACheck21 FinTech Cloud based SaaS solution.

“

“We are very pleased to continually offer new ACH and Check Capture workflow automation and software innovations.” said Sam Ackley, CEO of DCS Holdings, LLC d/b/a ACheck21.”

O. Sam Ackley, CEO DCS Holdings Group, LLC d/b/a ACheck21

Av21 lists a wide range of services and choices; at lower price points: direct integration to the bank or banks of choice or processing through multiple third party services; processing of ACH or Checks and Mobile Deposit of Checks; Same Day Deposits; White Label; Android and Apple operating system compatibility; fraud detection, identity verification; velocity and dollar controls; email service/alerts; robust reporting; free sandbox account and free access to the API and Mobile SDK.

“We are very pleased to offer cutting edge tools for the FinTech community. By using our knowledge of technology, experience in the industry, award winning hosted workflow

automation and strong alliances with partners like A2ia, MicroBilt, SnapCheck and others we are able to bring to the market an advanced ACH and Check service that truly allows our FinTech customers to achieve their dreams faster, at lower costs with a tool bag full of options”, said Sam Ackley, CEO of DCS Holdings, LLC d/b/a ACheck21

###

ACheck21 is an intelligent private cloud that combines highly secure ACH (Automatic Clearing House) and Check Deposit and ancillary services in a single hosted work flow. It provides a fast, efficient, and convenient way to automate ACH and check deposit workflow into electronic transactions without installed equipment or software. ACheck21 software is designed for any user,

organization or business to quickly and accurately make electronic deposits from point of sale, the internet, mobile devices, laptops, desktops and scanners. In addition ACHeck21 can capture and incorporate data from transactions into most accounting systems, including Intuit Quickbooks®. The ACHeck21 cloud interacts with and incorporates other services such as verification, account validation, watch list, duplicate detection and fraud detection. ACHeck21 represents an advanced, robust and comprehensive solution for any individual, group or company that wants the convenience and security of accurate ACH and check processing on the banking rails. The technology is extremely versatile; allowing customers to easily scan checks, make deposits, update accounts receivable systems, manage returns and archive checks and data. Additionally, the ACHeck21 user interface is extremely easy to use, eliminating the need for organizations to train staff on a new complicated system.
