[Global Food Grade Lubricants Market](#)

Description

Food grade lubricants refer to the group of industrial lubricants, which are used to minimize wear and tear on machinery in the industry by reducing binding and friction. In some extreme cases, they may also prevent or reduce electrical resistivity, while increasing thermal conductivity. These lubricants are applied on fluids, greases, and oils to prevent the corrosion of surfaces.

The analysts forecast the global food grade lubricants market to grow at a CAGR of 6.65% during the period 2017-2021.
