PUNE, MAHARASHTRA, INDIA, April 19, 2017 /EINPresswire.com/ -- Telehandler Market is poised to grow at 2.6% CAGR and is estimated to touch the market volume of 6,684 units by the end of forecast period.

Market Highlight

The Telehandler can be used for material handling, digging trenches, personnel elevation, and underground mine basket. Apart from lifting loads, they have wide applications, due to which they are used among various industry verticals. The telehandler makes significant contribution to the construction process by enabling materials to be unloaded from delivery vehicles,

transported around construction sites and be placed at heights. The market is also driven by the use of telehandler for industrial and infrastructural purposes. However, the growth of this market is expected to be restrained by the lack of trained operators.
