Description

Wiseguyreports.Com Adds "Personal Protective Equipment (PPE) -Market Demand, Growth, Opportunities and Analysis of Top Key Player Forecast To 2022" To Its Research Database

According to Stratistics MRC, Personal Protective Equipment (PPE) Market is expected to grow from $38.52 billion in 2015 to $62.86 billion by 2022 with a CAGR of 7.24%. Strict regulations by government bodies and security agencies about the use of personal protective equipment are fuelling the Personal Protective Equipment (PPE) market growth. Moreover, increasing awareness towards individual safety and security at workplace is impacting the market growth. However, availability of raw material, high cost of raw material and automation in end user industries are restraining the market.

Hand protection is the highest revenue generating segment owing to its extensive use in many enduser industries. However, fall protection segment would witness a significant growth during the forecast period. Healthcare segment is expected to witness maximum growth on account of rapidly launching new and advanced products. Due to increasing manufacturing industry in emerging regions, manufacturing segment dominated the global PPE end users market.
