How to Design a Modern Cannabis Dispensary?

Our expert [cannabis dispensary design](#) consultants here at [Quantum 9](#) have collectively created a guide to help companies design a safe and compliant [marijuana dispensary](#). When working with realtors, make sure you have at least 2,500-3,500 square feet within your cannabis dispensary. Your location is important. Pick a facility that is within a popular area with cross streets near the largest intersection in the city. Make sure there is a parking lot for 15+ cars. The ideal location is close to public transportation. It's important that the location satisfies state and federal zoning setbacks for schools, parks, playgrounds, places of worship, or places where children congregate and residences if applicable. Also, make sure your location is American with Disabilities Act compliant, ensure you have a wheelchair ramp and an automated door entry button.

How to design a dispensary

How to Design a Marijuana Dispensary

“

The cornerstone of the medical cannabis dispensary design ensures patient and employee safety.”

*Michael Mayes, CEO, of  
Quantum 9*

It's always a good idea to ask the surrounding local businesses in the area if they approve of a cannabis dispensary to be located so near to them, these businesses can make your life hell if they do not offer their support, so it is always nice to get this information early so you don't have to move later due to complaints to the city. Although this isn't a

requirement you should try to be at least 2,500 feet away from residential.

This article also includes:

- How to negotiate the proper dispensary lease before you receive your license.
