

# Foxminers - The Next Disruptive Technology in the Cryptocurrency Market

LOS GATOS, CA, USA, April 20, 2017 /EINPresswire.com/ -- Some people say that cryptocurrency mining is getting harder day by day, but now has been "out-foxed" by a new announcement from Foxminers, currently releasing worldwide, the world's first dual-miner hardware, which uses both SHA-256 and Scrypt to mine bitcoin and litecoin (<https://foxminers.com/products/>). Both dual-miners can also be customized for transactions of other cryptocurrencies that use SHA-256 or Scrypt.

Designed for Mining Power

Foxminer's mining chip, FM9800-XD112 is the result of brilliant hardware design that increases hash rates to maximum potential while keeping power consumption down. Both have a built-in controller and pre-installed software. After an intense period of testing, consisting of evaluating, prototyping, and extreme-condition pressure testing, the Foxminers F24 and F48 hardware products are now ready for mass production.

Pricing and Availability

The Foxminers F24 and F48 are available at a presale discount from [www.foxminers.com](http://www.foxminers.com). Pricing starts at \$2500. Customers can save \$500 by preordering, from now until May 14.

Delivery Fee and Custom Fee will be covered by Foxminers, the customer only pays for the unit and receives everything needed for setup without any hidden fees. "Consumers now know our competitors are beat. They can't reach our power, and our extremely low power costs. We have huge mining power - the f48 generates 75 TH/s for bitcoin and 2.1 GH/s for Litecoin. It's the best investment on the market," said Mike Harish Operational Director, COO, Foxminers. "We have strived to give customers the first-rate possible investment in the market." Watch the video at: <https://vimeo.com/212613185>

About FoxMiners

Founded in 2016, Foxminers, described as the world's first dual-miner company, was established to develop and sell the world's first leading dual cryptocurrency miners using SHA-256 or Scrypt technology. Starting with the Foxminers' 24, our task was to provide more power at lower costs. Foxminers is headquartered in Los Gatos, CA with offices around the globe. For more information see [www.foxminers.com](http://www.foxminers.com).
