[Global Automotive Carbon Ceramic Brake Rotors Market](#)

Description

A ceramic brake rotor is made of ceramic, which is an inorganic solid material. It is very hard yet light, stable, and water resistant. These rotors are one of the superior high-performance braking systems that are commercially available in the market. They help to overcome the drawbacks of iron brake rotors, offering optimum braking performance in sports, super sports, and heavy-duty vehicles.

Covered in this report

The report covers the present scenario and the growth prospects of the global automotive carbon ceramic brake rotors market for 2017-2021. To calculate the market size, the report considers the factory fitment by OEMS or automakers.

The market is divided into the following segments based on geography:

- Americas
- APAC

- EMEA

The Global Automotive Carbon Ceramic Brake Rotors Market 2017-2021, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. The report also includes a discussion of the key vendors operating in this market.

Key vendors

- Brembo
- SGL Group
- EBC Brakes
- Surface Transforms
- Fusion Brakes

Other prominent vendors

- Baer
- Rotor
- Wilwood Engineering

Market driver

- Performance and fuel efficiency benefits of carbon ceramic brake pads leading to increased adoption
- For a full, detailed list, view our report

Market challenge

- Relative high cost of ownership making them unsuitable for everyday driving
- For a full, detailed list, view our report

Market trend

- Advanced manufacturing processes incorporating lost core technology
