Feed acidifiers are expected to observe the fastest growth over the next nine years with an estimated CAGR of around 6.4% from 2016 to 2025. It has been evident that acidifiers are instrumental in increasing the shelf life of fodder, which further helps in minimization of the

overall feed cost, thus driving its market. In addition, increasing usage of feed acidifiers in the U.S. and Europe owing to ban on antibiotics is also expected to boost its demand over the forecast period.

Further key findings from the report suggest:

The global animal feed additives demand exceeded 256 kilo tons in 2015 and is expected to grow at a CAGR of 3.4% from 2016 to 2025.

Poultry emerged as the largest livestock segment in 2015 and is estimated to generate revenue over USD 5.7 billion by 2025.

Global animal feed antibiotics demand in aquaculture was USD 4.45 billion in 2015 and is anticipated to witness staggered growth over the next nine years.
