Report by Type (Independent leg type,  
Mat-type jackups) - Forecast to 2022*

PUNE, MAHARASHTRA, INDIA, April 24, 2017 /EINPresswire.com/ -- Market Highlights:

The growth of the jackup rigs market is majorly driven by increased oil & gas exploration activities around the world. The continuous growth of world population has resulted in increasing demands for energy.

Significant investment has been made in recent times, in the oil and gas engineering and procurement activities, especially in the Asia-Pacific and Middle East regions, where there is a huge demand for offshore drilling activities. However, the growth of this market can be restrained by the oil price volatility and depletion of oil reserves.

### Market Research Analysis:

Recent technological advancements in offshore drilling activities have made jackup rig operations, feasible and considerably cost effective than other methods. This has also resulted in increased operation depths of these rigs. Additionally, the technology is also now used in offshore wind turbine installations because of it's the operational feasibility. There has also been continuous investment in the oil & gas exploration activities in Asia Pacific and Middle East regions. Recent discoveries of offshore energy reserves in these regions have triggered the need for jackup rigs.

North America is expected to be the largest market for Jackup Rigs Market, especially in the Gulf of Mexico region. Europe is also expected to contribute to the further growth with exploration activities in the North Sea region. The Asia-Pacific and the Middle East regions are also expected to drive the market as there is an increasing requirement for offshore drilling undertakings here. All these factors increase the demand of jackup rigs, thereby leading to the growth of the market.
