

Critical Continuing Education Learning Brings Specialized Knowledge to Healthcare Construction Projects

On-Demand Course Dedicated to Ensuring Patient Safety

HEATHROW, FL, USA, April 24, 2017 /EINPresswire.com/ -- The Linders Health Institute is offering a critical continuing education program for architects, engineers, and contractors; as well as infection prevention specialists. This one of kind course on infection control during construction is for anyone involved in healthcare construction and maintenance activities. It is the first in a series of courses in relation to Risk Management for Infection Control during the construction process.

Completion of the one hour, on-demand course called [Healthcare Construction: Overview of Risk Management](#) will provide 1 continuing learning unit and LEED accreditation for USGBC and architects. The course is accredited by the American Board of Industrial Hygiene, American Institute of Architects, US Green Building Council (USGBC), ASHRAE and is the only course endorsed by these accrediting agencies for infection control.

This continuing education course is intended as an overview and review of the impact construction has regarding infection control, emerging infectious diseases in the built environment including air and waterborne pathogens and MRSA; as well as exposure of risks during construction for healthcare facilities.

This unique education program will not only help to position the student as a desirable candidate for healthcare construction jobs, but it will educate them on the dangers associated with construction of medical buildings including reducing the spread of health acquired infections. Healthcare construction is complicated as buildings often have strict regulatory requirements, operate 24/7 and there is a possibility of an impact on patient safety with regards to cross contamination.

We've made continuing education easy by allowing the student to take the course in the comfort of their home. [Register here](#) for the one hour, on-demand course and get 1 credit of continuing education. Gain knowledge and find resources needed to make crucial decisions in the healthcare construction environment, reduce risk for clients, healthcare workers, and patient populations.
