

Gartner Cites Halfpenny Technologies as an Emerging Company in the Healthcare Data Integration and Exchange Space

Halfpenny Technologies has been cited as an emerging company in the healthcare data integration space in a Gartner report.

BLUE BELL, PA, 19422, April 26, 2017 /EINPresswire.com/ -- Gartner Cites [Halfpenny Technologies](#) as an Emerging Company in the Healthcare Data Integration and Exchange Space

Blue Bell, PA: Halfpenny Technologies has been cited as an emerging company in the healthcare data integration space in a Gartner report entitled "Healthcare Provider CIOs need to stay on course and procure a Population Health Solution," February 2017, by Laura Craft.

"We are honored to be mentioned by Gartner as an Emerging Company in the Healthcare Data Integration and Exchange Space in their research article "Healthcare Provider CIOs Need to Stay on Course and Procure a Population Health Solution, Laura Craft, 07 February 2017" said Tim Kowalski, President and CEO of Halfpenny Technologies. Halfpenny Technologies is continually evolving the capabilities of our Clinical Data Exchange Platform to meet the ever changing data exchange needs of healthcare providers including health plans, hospitals, retail pharmacies and clinical laboratories. Our clinical data exchange platform provides a robust, highly scalable intelligent engine that is vendor agnostic providing for our clients to securely exchange real-time clinical data nationwide. "

Excerpt from Healthcare Provider CIOs Need to Stay on Course and Procure a Population Health Solution, Laura Craft, 07 February 2017.

"The healthcare industry is in need of industrial-strength integration and exchange capabilities in order to handle the new sources of data, the new types of data, and the incredible volumes of data that are being created, shared and used."

Halfpenny Technologies comprehensive Clinical Data Exchange platform uses a multi-faceted methodology to obtain clinical data. We do not rely solely on the use of the industry standards such as C-CDA ensuring that we capture all data types and data sources for our customers. A complete quality assessment is completed at each stage of data retrieval allowing us to identify how full or complete a clinical record is and highlighting missing sections or data elements. Ensuring our customers receive the complete volume of valuable clinical data on their members or patients, in real time.

*Gartner, Inc. Healthcare Provider CIOs Need to Stay on Course and Procure a Population Health Solution, Laura Craft, 07 February 2017.
