

Global Sperm Bank Market Analysis, Share, Trends and Forecast by 2025 - Market Research Report 2017

Market Research Report with Industry Analysis on "Sperm Bank Market by Donor Type, Service Type, Technology and Forecast 2025" is Available on Orbis Research.

DALLAS, TEXAS, U.S.A., April 25, 2017 /EINPresswire.com/ -- The [global sperm bank market](#) is expected to reach a value of USD 4.96 billion by 2025, according to a new report by Grand View Research, Inc. The technological advancements pertaining to assistive reproduction, increasing number of countries legalizing same-sex marriage, and growing government support toward sperm donation and donor offspring in various countries are some of the crucial factors expected to boost the market over the forecast period.

In 2015, North America held majority of the revenue share of the sperm bank market. The presence of large number of sperm banks and registered laboratories in North America is one of the key factors that can be accounted for the largest share. The regulations for sperm donation vary as per country; most of the countries have limit on the number of donor off springs and prohibition on the sperm usage of a deceased donor.

The increasing prevalence of infertility has led to huge demand for sperms and the presence of favorable government policies pertaining sperm donation and donor offspring are among some of the key factors anticipated to boost the market over the forecast period. Europe is the fastest growing segment owing to the disparity between demand (high) and supply (low) of sperm.

The growing number of insemination procedures, huge demand for known donors, and huge overall cost incurred in analysis and purification for insemination procedures are few of the factors responsible for majority of revenue share of donor insemination segment. However, In Vitro Fertilization (IVF) segment is expected to be the fastest growing segment over the forecast

period due to the growing demand for IVF procedures and growing awareness regarding the benefits of IVF over insemination procedures.

Further Key Findings from the Study Suggest:

In 2015, known donor was the largest donor type segment, owing to the huge cost of known sperms as compared to anonymous

Despite the presence of huge number of anonymous donors, this segment held a lower share of the overall the market

In 2015, semen analysis held majority of the revenue share due to the growing R&D, academic research, and assisted reproductive procedures.
