## Market Research Analysis

The packaging type is the most important for packaging of food, beverages, pharmaceutical products and others. Among all applications used for packaging, the food & beverage segment is expected to grow rapidly. The food & beverage segment also includes dairy products. The improved shelf life of the food and beverages due to barrier properties and valving capabilities is also expected to drive the growth of flexible lid stock packaging market for the food & beverage

segment.

Asia-Pacific region is expected to dominate the flexible lid stock packaging market with the highest CAGR due to the rapidly changing lifestyle, increase in the disposable income, extensive growth in population, and the constantly growing packaged food industry. The increasing urbanization has led to the increased use of convenient and low cost flexible lid stock packages amongst the people, thereby driving the growth of the market.

## Scope of the Report
