About Wrapping Equipment

Wrapping machine is an automatic or semi-automatic machine used to wrap mass product articles (such as biscuits, chocolates, and others) and large bag articles (such as pet food and cement), as well as aid in palletizing across industries. The report covers only secondary wrapping of large bundled products using stretch and shrink wrapping equipment. The stretch and shrink secondary wrapping segment is growing steadily, because it requires less space in a warehouse compared with corrugated boxes, which is a popularly used across end-users. A single pallet wrapping can hold as much as the 16 packs of corrugated boxes. The price of stretch and shrink films is another key contributing factor aiding the growth of this market. The raw materials used for stretch and shrink wrapping are stretch and shrink films, which are cheaper compared with the raw materials used for other forms of wrapping.

The analysts forecast the global wrapping equipment market to grow at a CAGR of 6.40% during the period 2017-2021.
