*Market Research Future*

Rich in energy and nutrients, edible nuts are essential part of healthy diet. Edible nuts are a huge source of nutrients such as omega-3, carotenes, manganese, potassium, calcium, iron, palmitoleic acids and B-complex group of vitamins. They are either used directly, or as added value products through extraction of edible oils and the manufacture of food products.

The trends towards healthy diet are driving the growth of edible nuts market worldwide. Edible nuts are majorly used by the food industry especially in the making of bakery and

confectionary products. Along with this increasing use of edible nuts in various food products is further driving the market growth. Advanced cultivation techniques and logistics network across the world is playing a key role in the development of the edible nuts market. Globally this market is expected to grow by 4.5% from 2016 to 2022 the MRFR Research Analyst takes us through market proceedings in a grasp; while commenting upon this deep diving study report published by Market Research Future, presented through more than 100 market data tables and figures and widely spread over 110 pages.
