

Next-Generation Power Semiconductors Market Trends and Global Forecast to 2027

Global Next-Generation Power Semiconductors Market Information, by Product Material (GaN, SiC), by Device

PUNE, MAHARASHTRA, INDIA, April 27, 2017 /EINPresswire.com/ -- Study Objective of Next-Generation Power Semiconductors Market

- To provide detailed analysis of the market structure along with forecast of the various segments and sub-segments of the [Global Next-Generation Power Semiconductors Market](#)
- To provide insights about factors affecting the market growth
- To analyze the Next-Generation Power Semiconductors market based on various factors- price analysis, supply chain analysis, porter's five force analysis etc.
- To provide historical and forecast revenue of the market segments and sub-segments with respect to four main geographies and their countries- North America, Europe, Asia, and Rest of the World (ROW)
- To provide country level analysis of the market with respect to the current market size and future prospective
- To provide country level analysis of the market for segment by product material, by device, by applications and sub-segments.
- To provide strategic profiling of key players in the market, comprehensively analyzing their core competencies, and drawing a competitive landscape for the market
- To track and analyze competitive developments such as joint ventures, strategic alliances, mergers and acquisitions, new product developments, and research and developments in the [Global Next-Generation Power Semiconductors](#) Market

Request for sample report at https://www.marketresearchfuture.com/sample_request/1079 .

Next generation power semiconductors is a new in power semiconductors. Currently silicon based power semiconductors is not able to satisfy the need of the work, thus companies are trying to develop next generation power semiconductors by use of SiC and GaN which will provide better electric connectivity.

The prominent players in the market of Next-Generation Power Semiconductors are-

- Infineon Technologies (Germany)
- STMicroelectronics (Switzerland)

- Mitsubishi Motors (Japan)
- Toshiba (Japan)
- Fairchild (U.S.)
- NXP Semiconductors (Netherlands)
- Fuji Electric (Japan)
- Semikron (U.S.)
- Vishay Intertechnology (U.S.)
- Renesas Electronics (Japan)

Industry News

- o In June 2016, Infineon Technologies announced the successful acquisition of Cree, Inc.
- o In May 2016, NXP Semiconductors announced the new product launch of new multi-channel LED Driver IC for automotive.
- o In December 2015, STMicroelectronics announced that Toyota industry is using STMicroelectronics Microcontrollers and Power Semiconductors for Voltage Converter.

The reports also covers brief analysis of Geographical Region includes:

Americas

North America

- US
- Canada

Europe

Western Europe

- Germany
- France
- Italy
- Spain
- U.K
- Rest of Western Europe
- Eastern Europe

Asia- Pacific

- Asia
- China
- India
- Japan
- South Korea
- Rest of Asia
- Pacific
- The Middle East & Africa

The report for Global Next-Generation Power Semiconductors Market of Market Research Future comprises of extensive primary research along with the detailed analysis of qualitative as well as quantitative aspects by various industry experts, key opinion leaders to gain the deeper insight of the market and industry performance. The report gives the clear picture of current market scenario which includes historical and projected market size in terms of value and volume, technological advancement, macro economical and governing factors in the market. The report provides details information and strategies of the top key players in the industry. The report also gives a broad study of the different market segments and regions.
