

# Molecular Weight Marker Market Analysis and Forecast 2025 by Application (PCR, Sequencing, Northern Blotting, etc.)

*OrbisResearch.com has published new research report on "Global Molecular Weight Marker Market Research Report and Forecast to 2025" to its database.*

DALLAS, TEXAS, USA, April 28, 2017 /EINPresswire.com/ -- The [global molecular weight marker market](#) is expected to reach a value of USD 1.1 billion by 2025, according to a new report by Grand View Research, Inc. Increasing investment in R&D by companies including biotechnology and biologics is the major factor that drives the growth during the forecast period. These markers are used by researchers and companies for various applications such as polymerase chain reaction (PCR), northern blotting, southern blotting, and molecular cloning. Thus, the increasing application of these products in R&D is expected to boost growth.

Orbis Research

Increasing focus on molecular biology research is another major factor supporting the growth of the molecular weight marker market. Molecular biology research is important to understand interactions between the different systems of a cell, including DNA, RNA, and protein biosynthesis & regulation. Thus, these research activities are very high in developed countries and are growing at a high pace in developing countries including China and India. Hence, there is a growing demand for molecular weight marker for research activities, which is expected to fuel the growth.

Further key findings from the study suggest:

DNA markers was the largest revenue-generating segment of the molecular weight marker market in 2016 and is also expected to showcase the fastest growth during forecast period.

Buy the report@<http://www.orbisresearch.com/contact/purchase/267638>

In the application segment, nucleic acid accounted for the largest share in 2016, owing to the large application of DNA markers in PCR, sequencing, northern blotting, southern blotting, and molecular cloning.

The academic and research institutes dominated the molecular weight marker market in terms of revenue in 2016, due to the large focus on molecular biology and other related research activities.

The North America molecular weight market is the leading regional sector and accounted for the

largest revenue share in 2016, mainly due to the existence of large number of research laboratories and biotechnology companies in this region.

The Asia Pacific market is projected to grow at a highest growth rate during the forecast period. The developing healthcare infrastructure and escalating interest on molecular research in the Asian countries such as India and China is a major factor contributing to the growth in this region.

Some of the major players include Thermo Fisher Scientific, Inc.; F Hoffmann-La Roche Ltd.; Merck KGaA; Agilent Technologies; QIAGEN; TAKARA BIO, INC.; Bio-Rad Laboratories, Inc.; Promega Corporation; and New England Biolabs.

Major Points From Table Of Contents:

Chapter One: Research Methodology

Chapter Two: Executive Summary

Chapter Three: Molecular Weight Marker Market Variables, Trends & Scope

Chapter Four: Molecular Weight Marker Market: Product Estimates & Trend Analysis

Chapter Five: Molecular Weight Marker Market: Type Estimates & Trend Analysis

Chapter Six: Molecular Weight Marker Market: Application Estimates & Trend Analysis

Chapter Seven: Molecular Weight Marker Market: End-Use Estimates & Trend Analysis

Chapter Eight: Molecular Weight Marker Market: Regional Estimates & Trend Analysis, by

Product, Type, Application, End Use

Chapter Nine: Competitive Landscape

About Us:

Orbis Research (orbisresearch.com) is a single point aid for all your market research requirements. We have vast database of reports from the leading publishers and authors across the globe. We specialize in delivering customized reports as per the requirements of our clients. We have complete information about our publishers and hence are sure about the accuracy of the industries and verticals of their specialization. This helps our clients to map their needs and we produce the perfect required market research study for our clients.
