

Speed Gate ID Gate 8500 – Secure, reliable, and visually appealing access control

iDTRONIC's new premium product, the Speed Gate 8500, is in the spotlight! With the ID Gate 8500, reliable technology and impressive design meet high standards.

LUDWIGSHAFEN, RHINELAND-PALATINATE, GERMANY, April 28, 2017 /EINPresswire.com/ -- Whether used for [access control](#) to a company's lobby, for a premium fitness club, a spa, or at an airport, design and appearance are important decision criterion in addition to reliability. With the [Speed Gate](#) ID 8500, iDTRONIC proves that a beautifully designed product can meet the highest technical standards and safety requirements. The RFID hardware-provider has combined access control systems with RFID technology in the Speed Gate ID Gate 8500 - bringing a perfect, premium solution to the market.

The Speed Gate ID Gate 8500 may be customized with gates accommodating different passage widths. Additionally, it may be equipped with double-sided sections, allowing flexible usage. The ID Gate 8500, with integrated HF-RFID reader (incl. Mifare), is now available and can be ordered at iDTRONIC in a variety of configurations.

With its housing in a stainless-steel design, the Speed Gate ID Gate 8500 makes a strong impression. Rounding off the modern design is its top cover fabricated from 10mm thick black, tempered glass. Two LED displays have been integrated into the cover of the speed gate. These LEDs indicate both, the operational status of the gate and the passage direction. Additionally, the ID Gate 8500 is equipped with a fully illuminated LED display which shows where to hold the card (or wristband) for verification. After a successful verification, the 10mm glass doors open. Furthermore, an integrated intrusion detection allows secure access during peak hours and prevents unauthorized simultaneous passage of two or more people.

The ID Gate 8500 opens after receiving a corresponding release. It can be opened manually, with a cable-connected remote panel, or automatically, via two optional HF-RFID readers (incl. Mifare). The gate is further equipped with automatic, anti-panic doors. If the ID Gate 8500 receives an emergency signal or is switched off, its doors automatically open when pushed backwards to facilitate quick evacuation.

About iDTRONIC GmbH

iDTRONIC GmbH is a tech company, which has specialized in the identification of persons and goods using RFID technology. The entire Well FIT line of products has been specially developed and tailored to the requirements of fitness and wellness centers, swim clubs, spas, amusement and water parks. Applications range from member and visitor administration – to increasing security and organization – and even include cashless payment. For many years, we have been providing first-class service and unmatched selection of cards and wristbands to some of the largest companies in the fitness and leisure industry. iDTRONIC counts many of the most prestigious leisure facilities among its clients, particularly in the fitness and spa industries.

The iDTRONIC Well FIT product line includes turnstiles, electronic locks, access control systems, RFID readers, multifunctional terminals, card printers, membership cards, and wristbands.
