

# Muscle Stimulator Market Research Report - Global Forecast to 2027

*Muscle Stimulation Market by end users (Sports Clinics, Hospitals, Physiotherapy Clinics) by Product (Transcutaneous electrical nerve stimulator)*

PUNE, MAHARASHTRA, INDIA, May 1, 2017 /EINPresswire.com/ -- Muscle stimulation is a process through which electrical impulses are used as a medium of therapy on muscles for relieving muscle pain. Muscle stimulation through electrical devices is called neuromuscular electrical stimulation or electromyostimulation. Muscle stimulation is used for the elicitation of muscle contraction which is done through electrical impulse. Most Muscle stimulators that have been approved by the FDA are used for the purpose of physiotherapy of a patient after an injury or rehabilitation under the direction of a medical expert. Muscle stimulators when used without the presence of a medical expert can result in shocks, burns, bruising and skin irritation thus the authorities have imposed strict regulations regarding the use of such electrical muscle stimulators. The use of electrical muscle stimulators have been very popular among sports scientists as it compliments sports training. The muscle stimulator device market is expected to register a CAGR of over 4% in next 5 years.

In terms of market revenue North America is expected to dominate the muscle stimulator device market. With the advancement of technology, increasing popularity of sports among children and adult, big sports leagues like NBA (basketball), Major league soccer(football), American league (baseball) the demand of muscle stimulation devices is only going to increase. The number of sports clinics and physiotherapy clinics has been on the rise according to recent trends which is further going to fuel the demand for Muscle Stimulation devices.

Europe closely follows North America in being a leading market for the muscle stimulation devices. Increasing cases of lower back injuries and injuries to the spinal cord are leading to the growth of muscle stimulation devices. Existence of major sports leagues such as La LIGA, Ligue 1, Liga Italia also fuels demand for muscle stimulation devices. More and more medical professionals have started to include such practices in their treatment. Government initiatives to improve healthcare facilities and increasing awareness regarding such practices are also going to improve the scope of the European muscle stimulation device market.

The reports also covers brief analysis of Geographical Region includes:  
Americas

- North America
  - o US
  - o Canada
- Europe
  - Western Europe
    - o Germany
    - o France
    - o Italy
    - o Spain
    - o K
  - o Rest of Western Europe
  - Eastern Europe
- Asia– Pacific
  - Asia
    - o China
    - o India
    - o Japan
    - o Rest of Asia
  - Pacific Countries

#### The Middle East& Africa

Every report of Market Research Future comprises of extensive primary research along with the detailed analysis of qualitative as well as quantitative aspects by various industry experts, key opinion leaders to gain the deeper insight of the market and industry performance. The report gives the clear picture of current market scenario which includes historical and projected market size in terms of value and volume, technological advancement, macro economical and governing factors in the market. The report also gives a broad study of the different market segments and regions.
