Key Highlights

- The containers and packaging market consists of packaging made of paper and card, plastic, metal and glass. It does not include packaging that is used only for transportation purposes such as wooden crates, pallets, steel drums etc.
- The market is valued at manufacturers' selling prices (MSP), while market volumes represent consumption.
- Any currency conversions used in this report have been calculated using constant 2016 annual average exchange rates.
- The global containers & packaging market had total revenues of \$862.6bn in 2016, representing a compound annual growth rate (CAGR) of 3.2% between 2012 and 2016.
- Market consumption volume increased with a CAGR of 2.8% between 2012-2016, to reach a total of 644.1 million tons in 2016.
- The global market is characterized by environmental concerns especially with regards to sustainability of packaging. Most developed markets such as the US and the European market, are set to be regulated in favour of environmental protection which means that plastics packaging manufacturers' standards should be adjusted. On the other hand, the Asia-Pacific market is still emerging as consumer demand for packaged goods in China and India is not yet saturated.
