## Description

Wiseguyreports.Com Adds "Mining Explosive -Market Demand, Growth, Opportunities and analysis of Top Key Player Forecast to 2021" To Its Research Database

The Mining Explosive is the time and place where a retail transaction is completed. At the point of sale, the merchant would calculate the amount owed by the customer and indicate the amount, and may prepare an invoice for the customer (which may be a cash register printout), and indicate the options for the customer to make payment. It is also the point at which a customer makes a payment to the merchant in exchange for goods or after provision of a service. After receiving payment, the merchant may issue a receipt for the transaction, which is usually printed, but is increasingly being dispensed with or sent electronically.
