IT Governance partners with Lumina Technologies to deliver cyber security and data protection solutions

ELY, CAMBRIDGESHIRE, UNITED KINGDOM, May 5, 2017 /EINPresswire.com/ -- IT Governance, the leading provider of cyber security solutions and expertise, is excited to announce its partnership with computer support and services provider Lumina Technologies.

Alan Calder, the founder and executive chairman of IT Governance, said: "We are delighted to join forces with Lumina Technologies to help more organisations achieve cyber resilience.

"Our data protection and information security training courses, e-learning, consultancy services, penetration testing, documentation toolkits and books are designed to equip organisations with across-the-board resources to manage compliance with and certification to industry standards and regulations."

As part of its managed IT service provision, Lumina Technologies has been taking care of its clients' cyber security for nearly 20 years. This new partnership will enable it to enhance its provision further by offering Cyber Essentials certification, penetration testing and GDPR training.

Richard McBarnet, the MD of Lumina Technologies, said: "We are really excited about being able to offer independent assessment of our clients' security environments from a trusted and well-respected industry partner. Our partnership will help us to deliver complete cyber security solutions with external validation, which can only benefit our clients still further."

IT Governance's partnership programme is designed to help organisations provide an extended portfolio of cyber security products and services, while providing access to sales, financial and technical support. Alongside this, IT Governance's partnership programme offers benefits such as discounted training and certification, partner events, and access to webinars, training resources and tools.

"With the GDPR coming into effect in May next year, data protection will be a requirement for every organisation collecting and processing personal data. Our partners and their clients will be able to take advantage of our cost-effective solutions and expertise to avoid the fines associated with a data breach under the GDPR," Alan Calder continued.
