

# ACHECK21® ANNOUNCES ENHANCED REPORTING AND MANAGEMENT CONSOLE

*ACheck21 offers online management console with dashboard reporting of all ACH and ICL transactions with “drill down” and export capabilities.*

ST CHARLES, MO, UNITED STATES,  
May 8, 2017 /EINPresswire.com/ --

ACheck21® enhanced on line management console allows our users to monitor, manage and research all activity when using ACheck21. Whether you are using one [ACH](#) entry class or using all the ACH classes as well as Check21

(a/k/a Image Cash Letter) you are able to view your activity in summary or down to the minutest detail. Enhanced features including [reporting](#) of credits, debits, returns, verification, validation as well as the ability to export activity into CSV or PDF files. All reporting services are accessible by user log in or through the ACheck21 API and include archived transactions, [check](#) and document images for prior 36 months.

We are very pleased to be able to continually offer new services.” said Sam Ackley, CEO of DCS Holdings Group, LLC d/b/a ACheck21. “With ACheck21, any customer can see immediate ROI.”

*O Sam Ackley*

The ACheck21 management console is included with the ACheck21 service and accessible as a user role. According to Ryan Ackley, Senior Developer at DCS Holdings Group, LLC the owner of the ACheck21 brand, the enhanced reporting service will not only report activity but also offers interactive features such as re-presentation of returns and manual origination of ACH credits/debits.

“This exciting enhancement of our online reporting consolidates all reporting from all the many options available with ACheck21 to originate payments or capture checks”, said Sam Ackley, CEO of DCS Holdings Group, LLC the owner of ACheck21. “It works seamlessly with ACH, check capture or check issuance (SnapCheck) whether originating through our RESTful API, Mobile, RDC, Remittance, Kiosks or Point of Sales”, according to Ackley.

It works like this: ACheck21 management console is accessible on line, by location, region or all locations and regions summarized under the company. The reporting dashboard offers a summary of all credits/debits, returns and return reason codes. Users may “drill down” from the summary to batches, transactions, disbursements and returns. Each transaction is view-able, along with its history and includes the Meta data and, in the case of Check21, images of checks front and back. Other management features include: Account ledger that balances to bank statements; trust ledger showing funds in transit, journal entries for manual adjustments; user roles; verification reporting showing verification status of each transaction; Archived documents ancillary to a transactions (payment stub, drivers licenses, passport); billing services; E-checks and more.

This enhanced reporting continues the ACheck21 tradition of providing a smarter way to manage digital payments – Nimble Technology – Superior Reliability – Expert Advice to help businesses solve business problems by saving time and expense while improving accountability.
