

# FileFinder Anywhere Crowned “Best Executive Recruiting Software” Following Independent, Global Analysis

LONDON, UNITED KINGDOM, May 8, 2017 /EINPresswire.com/ -- Dillistone Systems, the leading global provider of technology to executive search firms and strategic recruiting teams, is proud to announce that FileFinder Anywhere, its flagship [cloud Executive Search software](#), has been declared “[Best Executive Recruiting Software](#)” in an independent review by global analysts BND.

Prior to reaching a conclusion, BND’s researchers started with an extensive list of vendors and looked for solutions that are affordable and easy to use, and come with key features like research, analytics, reporting and automation such as importing application and résumé data into software. They also looked at mobile access, help/customer support, customization and branding options.

To help inform their decisions, BND asked small business owners, hiring managers and recruitment professionals about what to look for in recruitment software, which products they recommend, and what they like or don’t like about the software they currently use or have used in the past. BND’s researchers also tested or participated in demos for all the software when possible to help evaluate ease of use.

“

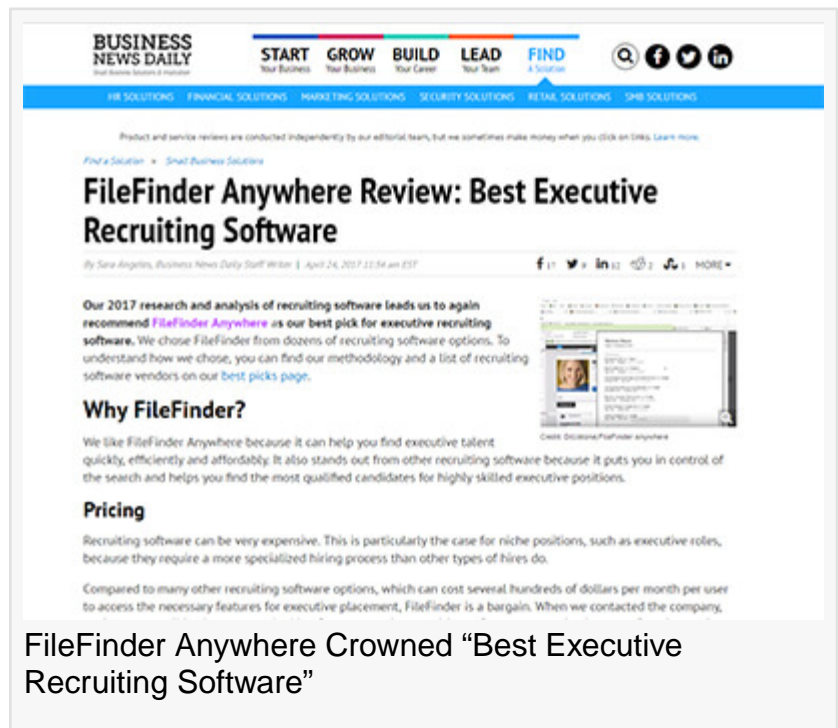

We are delighted to have FileFinder’s status as the premier product for executive search validated by this entirely independent review.”

*Jason Starr, Managing Director, Dillistone Systems*

The 2017 research and analysis of recruiting software lead to again recommend FileFinder Anywhere as their best pick for executive recruiting software. BND chose FileFinder from dozens of recruiting software options because it can help its

users find executive talent quickly, efficiently and affordably.

Jason Starr, Managing Director of Dillistone Systems, commented: “We are delighted to have FileFinder’s status as the [premier product for executive search](#) validated by this entirely independent review. Delighted, but not surprised. In 2016, we signed over 100 new firms onto our platforms with both the largest US and the largest European Search firms to implement new systems choosing
