

Massey Consulting Drives Faster End-Of-Month Closes for On-Premise Customer by Moving them to the Cloud

Massey Consulting announced they have helped move American Safety Products to a cloud-based ERP solution.

RALEIGH, NORTH CAROLINA, UNITED STATES OF AMERICA, May 9, 2017 /EINPresswire.com/ -- Raleigh, N.C., May 2, 2017 --- [Massey Consulting](#), a leading accounting software consulting firm in

Raleigh, NC, announced they have helped move American Safety Products to a cloud-based ERP solution. American Safety Products is a leader in providing high quality products and customized solutions to protect the employee and the environment as well as divisions 10 construction sub-contracting.

“After we purchased Microsoft Dynamics GP, we had a change of reseller and began working with Massey Consulting in 2003,” said American Safety Products President, Warren H. Arrington, Jr. “Technology and software solution choices have changed dramatically since then. American Safety Products wanted to take advantage of all the benefits of the Cloud. We are happy that we can deploy cloud-based [Intacct](#) software and continue to have Philip Massey and his team as our technology partner.”

American Safety Products faced similar issues to other companies ready to move to the cloud. Their end-of-month closing was taking additional time every month that they could not afford to lose. They were also consistently running into problems with their reports which was eating up valuable time that could be spent more strategically.

“We are constantly ensuring our customers have the best and latest ERP solutions that can help drive their business forward,” said Philip Massey. “When we find that there could be a better option, we present it to our customers. We are fully committed to our customers’ success!”

American Safety Products will be able to use the reporting capabilities of Intacct to meet their federal and private funding reporting requirements. Intacct offers dimensions which gives ASP better flexibility when managing their general ledger. After implementation, Intacct will reduce the amount of time necessary end-of-month closing, which will allow American Safety Products to focus on growing their business.

By automating revenue recognition posting to the general ledger and aspects of contract management, including renewal opportunities and billings, American Safety Products will operate more efficiently. Integration with other business-critical software and Intacct financial accounting, will provide greater insight into the business, by showing profitability by product lines, geographies, customer type, and any other functions the company wishes to track.

“We look forward to reducing the time of end-of-month closings for our company, and the ability to focus on business growth instead,” said Arrington.

About Massey Consulting

Founded in 2002, Massey Consulting is a reseller for accounting software products Intacct and Microsoft Dynamics GP. Our consultants boast a wealth of practical field experience gained as controllers, accountants and information system professional in a wide range of business environments. We are certified, recognized experts in each of the software solutions we offer. Our clients benefit from efficient, integrated solutions that allow them to focus more their business and less on their software. Massey Consulting currently serves over 80 clients across the United States and Canada. www.masseyconsulting.net
