

Rently Keyless Announces Partnership with Yale

Leading smart home company partners with respected international brand to enhance customer experience.

LOS ANGELES, CA, UNITED STATES, May 9, 2017 /EINPresswire.com/ -- Rently Keyless, the premier provider of smart home solutions for renters and property managers nationwide, is excited to announce their most recent partnership with Yale Locks & Hardware —one of the oldest and most respected international lock companies.

Now supporting the full range of Yale Real Living Z-Wave enabled locks, every Rently Keyless Hub will seamlessly function with the Yale Real Living and nexTouch product lines. Unlike other smart-home companies, the Rently Keyless Hub was engineered from the ground up to ensure enterprise clients get the best smart-home technology available. Utilizing Wi-Fi, ethernet and cellular —combined with Z-Wave and Bluetooth technologies —clients have the most secure, scalable and trusted smart home protocols on the market.

“The Yale Real Living product line is the perfect addition to the Rently Keyless family. Excellent design, high capacity storage and a robust warranty are just some of the reasons why we chose to partner with Yale,” says Andre Sanchez, Division Manager for Rently Keyless. “With this partnership, both Rently and Yale clients will have access to truly best-in-class smart-home technology.” said Rently Keyless co-founder, Merrick Lackner.

Rently Keyless, by combining keyless entry locks and other smart home devices with their Tri-band hub and software, allows property managers and other enterprise clients the ability to provide cutting edge smart-home technology to residents, to reduce key-based liability, generate real-time access logs for every code, and more.

“Rently Keyless is a leader in smart home solutions for the rental market, and Yale is pleased to partner with them to provide property managers and renters the convenience and security of our Yale Real Living and nexTouch electronic deadbolts.” said Jason Williams, President, ASSA ABLOY Residential Group, which includes Yale Residential.

About Rently Keyless

The Rently Keyless smart home system was built from the ground up specifically with enterprise clients in mind. Providing access solutions since 2012, Rently’s technology is utilized by thousands of property managers and millions of renters nationwide. The Rently Keyless software platform allows managers and renters to benefit from smart home technology, without the need for wi-fi.
